

## Project Name ' s

### `` woman credit / University credit Project ``

Open date : January 2017

Start Planed : January 2017

Finish date actuel : illimited to finish no limite Project

#### Description . (WHY)

Woman' s Credit Project

University Credit project

They are one project means two names. Woman's Credit project was an execution since about 3 years. There are about 50 women benefit of this project.

After analysis the situation economical some young people leaving their university. They wait a job from the government sometimes they depended on their parents or family. The team of MDO, to present to Missionsund Bastel gruppe Brachelen this Project, Considering woman's project and university. Project annex for one project married together the same object.

``Help the poor people who need the change their situation economical to build. Their own job using this Credit to construct their business.

The result that we wait from them :They change their situation economical. We have seen, the animal project the woman's Credit project done the big result in the context of situation economical.

In fact we want to add with woman' project / university project for giving a push to the young people leaving their university.
